

START HERE - Neue Konversation

Erstellt: 31. Dezember 2025

Zweck: Schnelleinstieg für neue JNX-OS Konversation

Die 3 ESSENTIAL DOKUMENTE

1. ★ JNX_OS_MASTER_DOCUMENTATION_V2.pdf (58 KB)

DIE HAUPT-REFERENZ - Alles in EINEM Dokument!

Enthält:

- ✓ Complete Project Overview
- ✓ Tech Stack Details (Next.js 14, Clerk, Supabase, Stripe, Shopify)
- ✓ **Alle 9 Database Tables** mit vollständigem Schema
- ✓ **Alle 13 API Endpoints** dokumentiert
- ✓ **Stripe Integration** (3 Pricing Tiers: \$29/\$79/\$199)
- ✓ **Logo Design System** (SVG Component)
- ✓ **Testing Guide** (24 Tests, 5 Scenarios)
- ✓ **Complete File Structure** (53 directories, 221 files)
- ✓ Deployment Status
- ✓ Phase Roadmap (5A++ complete)
- ✓ Success Metrics (Before/After)

Wann verwenden: Als PRIMARY REFERENCE für alle technischen Details.

2. 🇵🇸 STRIPE_SETUP_GUIDE_V2.pdf (37 KB)

Detaillierte Stripe-Konfiguration

Enthält:

- ✓ 3 Pricing Plans (Starter/Professional/Business)
- ✓ 5 Webhook Events (checkout, subscription, invoice)
- ✓ Webhook URL & Secret
- ✓ SaaS Installation Flow (14 Steps)
- ✓ API Endpoints (Checkout, Webhook)
- ✓ Test Cards & Testing Guide
- ✓ Monitoring Setup (Stripe/Supabase/Vercel)
- ✓ Security Best Practices
- ✓ Subscription Lifecycle States

Wann verwenden: Für Stripe-spezifische Fragen oder Billing-Features.

3. 📋 UPDATED_DOCS_FOR_NEW_CONVERSATION.pdf (30 KB)

Quick Start Guide für neue Konversation

Enthält:

-  Übersicht aller aktualisierten Docs
-  **What's New** (Logo System, Phase 5A++)
-  Deployment Status (Live at www.jnxfabs.ai)
-  File Locations (Doku & Code)
-  Quick Start Commands
-  Key Context für neue Konversation
-  Priority References
-  Checklist für neuen Agent

Wann verwenden: Als EINSTIEG für die neue Konversation.

Reihenfolge für neue Konversation

1. **Zuerst:** `UPDATED_DOCS_FOR_NEW_CONVERSATION.pdf` lesen (Quick Context)
 2. **Dann:** `JNX_OS_MASTER_DOCUMENTATION_V2.pdf` als Referenz verwenden
 3. **Bei Bedarf:** `STRIPE_SETUP_GUIDE_V2.pdf` für Billing-Details
-

Was ist NEU? (Phase 5A++)

Logo System

- **Component:** `components/ui/jnx-logo.tsx`
- **Typ:** Native SVG (nicht PNG)
- **Variants:** default (cyan) | admin (purple)
- **Animationen:** Framer Motion (bubbles, particles)
- **Größen:** sm/md/lg
- **File Size:** 0 KB (inline)

Integration

-  Homepage (Header, Footer, Product Card)
-  User Dashboard Sidebar
-  Admin Dashboard Sidebar

Git Status

- **Commit:** `4015b5f` (Logo SVG component)
 - **Status:** Pushed & Deployed
 - **Production:** Live at www.jnxfabs.ai
-

Aktueller Status

Production

- **URL:** <https://www.jnxfabs.ai>
- **Status:**  Live

- **Last Deploy:** 31. Dezember 2025, 10:20 UTC
- **Build:**  Successful (0 TypeScript Errors)

Environment

- **Clerk:** Live Mode 
- **Supabase:** Production 
- **Stripe:** Live Mode  (Webhook verified)
- **Shopify:** App Active 

Performance

- **Build Time:** < 90s
- **Bundle Size:** 87.3 KB (shared)
- **Dashboard Load:** < 3s
- **Uptime:** 99.9%+

Für die neue Konversation mitteilen

Quick Context

Projekt: JNX-OS v2 + Qryx AI Sales Assistant
 Status: Phase 5A++ Complete (Logo Integration done)
 Commit: 4015b5f (SVG Logo Component)
 Production: Live at www.jnxfabs.ai
 Next Phase: Phase 5B (Billing Dashboard)

Wichtige Infos

- Logo ist jetzt **SVG Component** (nicht PNG)
- Alle Webhooks sind **idempotent**

- Session Management mit **JWT** (30min TTL)
- Database: **9 Tables**, 23 Indexes, 6 Foreign Keys
- Testing: **24 Tests** (54% automatisiert)
- Dokumentation: **25+ Files**, alle aktuell

Quick Commands

```
# Projekt öffnen
cd /home/ubuntu/jnx-os/nextjs_space

# Dependencies installieren (falls nötig)
yarn install

# Dev Server starten
yarn dev

# Production Build
yarn build

# Tests ausführen
yarn playwright test

# Git Status checken
git log --oneline -5
```
