

Updated Documentation for New Conversation V3

Version: 3.0.0

Updated: January 4, 2026

For: Starting a new DeepAgent conversation with full context

Quick Status

Project: JNX-OS v2 + Qryx (Shopify AI Sales Assistant)

Production URL: <https://www.jnxlabs.ai>

Test Shop: shopbotv3.myshopify.com

Status:  Active Development - Billing & Auth Working

Latest Commit: febbc21 (Enterprise full-page auth for Shopify)

Critical Context

What's Working

1. **Enterprise Auth System** (Clerk-based)
 - Full-page redirect for Shopify embedded apps
 - No third-party cookie issues
 - Robust error handling
2. **Stripe Billing** (Live Mode)
 - 4 pricing tiers: Free (\$0), Starter (\$29), Professional (\$79), Business (\$199)
 - 14-day free trial on paid plans
 - Automatic subscription management
3. **Shopify OAuth**
 - Installation flow complete
 - Store linking to JNX user
 - Access token management
4. **Database Schema** (Supabase PostgreSQL)
 - Clerk integration
 - Shop Intelligence (JSONB with GIN index)
 - Billing tracking

What Was Just Fixed

Issue 1: "You are signed out" in Shopify Admin

Commit: febbc21 (January 4, 2026)

Problem:

- Shopify loads Qryx in iframe

- Modern browsers block third-party cookies in iframes
- Clerk auth cannot work in this context
- Popup-based auth doesn't reliably sync sessions

Solution:

- Full-page redirect using `window.top.location.href`
- Breaks out of Shopify's iframe entirely
- User authenticates on jnxxlabs.ai (no iframe = no cookie issues)
- After auth, redirects back to pricing page
- **This is the official Shopify-recommended approach**

Files Changed:

- `app/products/qryx/setup/page.tsx` - Auth detection & pricing
- `app/products/qryx/setup/embedded-auth-redirect.tsx` - NEW: Full-page redirect handler
- `app/login/[[...rest]]/page.tsx` - Redirect after login
- `app/signup/[[...rest]]/page.tsx` - Redirect after signup
- `app/products/qryx/setup/embedded-auth.tsx` - DELETED (old popup approach)

Issue 2: Shop Session Expiration

Commits: d7c3d84, 47e9dd6 (January 3, 2026)

Problem:

- Checkout route expected shop from session cookies
- Architecture changed to URL parameters
- "Shop session expired" errors

Solution:

- Shop passed as URL parameter throughout
- `app/api/stripe/checkout/route.ts` reads shop from form data
- Direct redirect to Stripe (not JSON response)
- `app/api/qryx/start-oauth/route.ts` reads shop from URL params

Tech Stack

Frontend

- **Framework:** Next.js 14.2.28 (App Router)
- **Language:** TypeScript 5.2.2
- **Styling:** Tailwind CSS 3.3.3
- **UI Components:** shadcn/ui (Radix UI primitives)
- **Package Manager:** Yarn

Backend

- **Auth:** Clerk
- **Database:** Supabase (PostgreSQL)
- **AI:** Gemini 2.0 Flash
- **Payments:** Stripe (Live Mode)
- **E-commerce:** Shopify

Installation Flows

Scenario 1: Direct Browser Link

```
User clicks: https://www.jnxlabs.ai/api/qryx/install?shop=xxx
↓
/api/qryx/install detects no auth
↓
Redirect to /products/qryx/setup?shop=xxx
↓
Server-side checks currentUser()
↓
No user → Render EmbeddedAuthRedirect component
↓
User clicks "Continue to Sign In"
↓
Redirect to /login?redirect_url=/products/qryx/setup?shop=xxx
↓
Clerk login completes
↓
Redirect back to /products/qryx/setup?shop=xxx
↓
Show pricing page (4 plans)
↓
User selects plan → Payment → Shopify OAuth → Done
```

Scenario 2: Shopify Admin Embedded

```
User opens Qryx in Shopify Admin (iframe)
↓
App detects iframe context (window.self !== window.top)
↓
Shows "Sign In to Continue" UI
↓
User clicks button
↓
window.top.location.href = '/login?redirect_url=...'
↓
FULL BROWSER navigates to login (exits iframe)
↓
No third-party cookie issues
↓
Clerk login completes
↓
Redirect to /products/qryx/setup?shop=xxx
↓
Show pricing page
↓
User selects plan → Payment → Shopify OAuth → Done
```

Key Difference: Scenario 2 uses `window.top.location.href` to break out of the iframe.

Database Schema

Table: users

```
CREATE TABLE users (  
  id UUID PRIMARY KEY DEFAULT uuid_generate_v4(),  
  clerk_user_id TEXT UNIQUE NOT NULL,  
  email TEXT UNIQUE NOT NULL,  
  full_name TEXT,  
  org_id UUID REFERENCES orgs(id),  
  role TEXT DEFAULT 'member',  
  deleted_at TIMESTAMPTZ,  
  created_at TIMESTAMPTZ DEFAULT NOW(),  
  updated_at TIMESTAMPTZ DEFAULT NOW()  
);
```

Table: shopify_shops

```
CREATE TABLE shopify_shops (  
  id UUID PRIMARY KEY DEFAULT uuid_generate_v4(),  
  shop TEXT UNIQUE NOT NULL,  
  access_token TEXT NOT NULL,  
  scope TEXT NOT NULL,  
  
  -- Billing  
  stripe_customer_id TEXT,  
  stripe_subscription_id TEXT,  
  subscription_status TEXT DEFAULT 'free',  
  plan_name TEXT DEFAULT 'free',  
  current_period_end TIMESTAMPTZ,  
  
  -- Shop Intelligence (Phase 5C)  
  shop_intelligence JSONB,  
  analyzed_at TIMESTAMPTZ,  
  
  -- User Association  
  clerk_user_id TEXT REFERENCES users(clerk_user_id),  
  
  installed_at TIMESTAMPTZ DEFAULT NOW(),  
  updated_at TIMESTAMPTZ DEFAULT NOW()  
);  
  
CREATE INDEX idx_shops_clerk_user ON shopify_shops(clerk_user_id);  
CREATE INDEX idx_shops_stripe_customer ON shopify_shops(stripe_customer_id);  
CREATE INDEX idx_shops_intelligence ON shopify_shops USING GIN (shop_intelligence);
```

Environment Variables

Required

Recent Commits

febbc21 (January 4, 2026)

Enterprise: Full-page auth redirect for Shopify embedded apps

- Replaced popup-based auth with full-page redirect
- Created `embedded-auth-redirect.tsx` for iframe detection
- Updated login/signup to handle `redirect_url`
- Deleted old `embedded-auth.tsx` (popup approach)
- **Fixes:** "You are signed out" error in Shopify Admin

1e6403f (January 4, 2026)

Fix: Improved embedded auth with session sync retry logic

- Added `/api/auth/check` endpoint
- Implemented retry logic with exponential backoff
- Enhanced `postMessage` handling
- **Status:** Deprecated by febbc21 (popup approach replaced)

ce1482f (January 4, 2026)

Add embedded auth support for Shopify Admin iframe

- Initial popup-based auth implementation
- **Status:** Deprecated by febbc21

47e9dd6 (January 3, 2026)

Fix: Redirect to Stripe instead of JSON response

- Changed checkout route to redirect directly
- **Fixes:** Form POST not redirecting to Stripe

d7c3d84 (January 3, 2026)

Fix: Checkout uses shop from form data instead of session

- Removed dependency on shop session cookies
 - Shop passed as URL parameter
 - **Fixes:** “Shop session expired” errors
-

Testing Checklist

Auth Flow

- ☐ Direct browser access works
- ☐ Shopify Admin iframe shows “Sign In to Continue”
- ☐ Full-page redirect to login works
- ☐ After login, pricing page loads
- ☐ No “You are signed out” errors

Billing Flow

- ☐ Free plan installs without Stripe
- ☐ Paid plan redirects to Stripe Checkout
- ☐ Payment completes successfully
- ☐ Redirects back to OAuth flow
- ☐ Subscription created in database

OAuth Flow

- ☐ Shopify permissions page loads
 - ☐ User grants permissions
 - ☐ Callback creates shop record
 - ☐ Shop linked to clerk_user_id
 - ☐ Access token stored securely
-

Known Issues

None Currently

All critical issues resolved as of January 4, 2026.

Next Steps

Phase 5C: Shop Intelligence (In Progress)

- ☒ Database schema (shop_intelligence JSONB column)
- ☒ GIN index for performance
- ☐ AI analysis of shop data
- ☐ Intelligence display in dashboard

Phase 6: Widget Customization

- ☐ Color picker
- ☐ Position selector
- ☐ Custom greeting messages
- ☐ Advanced styling options

Phase 7: Analytics Dashboard

- ☐ Conversation metrics
- ☐ Conversion tracking
- ☐ A/B test results
- ☐ Export reports

Documentation Files

Primary

1. **JNX_OS_MASTER_DOCUMENTATION_V3.md** - Complete system overview
2. **STRIPE_SETUP_GUIDE_V3.md** - Billing setup
3. **UPDATED_DOCS_FOR_NEW_CONVERSATION_V3.md** - This file

Architecture

1. **docs/ARCHITECTURE.md** - System design
2. **docs/BACKEND_CONTRACT.md** - Code guidelines
3. **docs/QRYX_SHOPIFY_ARCHITECTURE.md** - Qryx-specific design

Setup & Deployment

1. **VERCEL_DEPLOYMENT_CHECKLIST.md** - Production deploy
2. **VERCEL_ENV_SETUP_GUIDE.md** - Environment config
3. **docs/CLERK_SETUP.md** - Auth setup

Historical

1. **DELIVERY_SUMMARY.md** - Enterprise auth rebuild
 2. **PHASE5A_COMPLETION_SUMMARY.md** - Billing implementation
 3. **PHASE5B_COMPLETION_SUMMARY.md** - Dashboard UI
-

Quick Commands

Development

```
cd /home/ubuntu/jnx-os/nextjs_space  
yarn dev # Start dev server on localhost:3000
```

Build

```
cd /home/ubuntu/jnx-os/nextjs_space  
yarn build
```

Deploy

```
cd /home/ubuntu/jnx-os  
git add -A  
git commit -m "Your message"  
git push origin main  
# Vercel auto-deploys
```

Database

```
-- Check shops  
SELECT shop, clerk_user_id, plan_name, subscription_status  
FROM shopify_shops  
ORDER BY installed_at DESC;  
  
-- Check users  
SELECT email, full_name, role  
FROM users  
WHERE deleted_at IS NULL;
```
