

Qryx AI Sales Assistant - Testing & Improvement Guide

Date: December 31, 2025

Status: Phase 5B Complete - Ready for E2E Testing

Production URL: <https://www.jnxfabs.ai>

Test Shop: shopbotv3.myshopify.com

Executive Summary

What's Working

- SaaS Installation Flow** (14 steps)
 - Shopify Install → Login/Signup → Plan Selection → Payment → OAuth
 - Session encryption with 30-minute expiry
 - Stripe Live Mode integration
 - Usage Tracking & Billing**
 - Real-time conversation counting
 - Plan limits: Starter (500), Professional (2000), Business (5000)
 - Soft limits with warnings at 80% and 100%
 - Atomic increment with Row-Level-Locking
 - Gemini 2.0 Flash Integration**
 - Chat completion API working
 - Cost: ~\$0.0001 per message
 - Sub-3-second response times
 - Widget Delivery**
 - Dynamic JavaScript generation
 - Shop-specific configuration
 - CORS-enabled for embedding
-

Critical Gap: Shop Analysis Quality

Current Implementation (Basic)

System Prompt:

```
You are Qryx, an AI sales assistant for {ShopName}.  
Your role is to help customers find products...
```

Product Context:

1. Product Title - \$XX.XX
Short description...

✗ Problems:

1. **Generic Approach:** Same prompt for Fashion, Tech, Food, Beauty shops
2. **No Shop Intelligence:** Doesn't analyze shop category, target audience, brand voice
3. **Shallow Product Context:** Missing keywords, categories, best-sellers
4. **No Customer Journey:** Doesn't understand intent (browsing vs. ready to buy)

Test Plan

Phase 1: Zero-Click Installation

Test Case 1.1: New Merchant

Steps:

1. Visit: <https://www.jnslabs.ai/api/qryx/install?shop=shopbotv3.myshopify.com>
2. Create account (Clerk)
3. Select plan (Professional \$79/mo)
4. Complete Stripe payment
5. Authorize Shopify OAuth
6. Verify dashboard shows shop

Expected: Shop connected, subscription active, widget available

Phase 2: AI Chat Quality

Test Scenarios:

1. Greeting: "Hi!"
2. Product Discovery: "I'm looking for a gift"
3. Specific Query: "Do you have headphones?"
4. Out of Stock: "I want Product X"
5. Price Question: "What's your cheapest laptop?"

Phase 3: Widget Integration

Steps:

1. Get shop_id from database
2. Visit: https://www.jnslabs.ai/api/widget/qryx?shop_id=xxx
3. Install in Shopify store
4. Test chat functionality

Phase 4: Usage Tracking

Steps:

1. Start 5 conversations
2. Check database: conversations_used should increment
3. Test 80% warning
4. Test 100% limit

Priority Actions

Critical (Before Launch)

1.  Execute RPC Migration (MIGRATION_PHASE5B_RPC_FUNCTION.sql)
2.  Enhance Shop Analysis (MAJOR IMPROVEMENT OPPORTUNITY)
3.  Test Full Installation Flow

High Priority (Week 1)

1. Test Widget Embedding
 2. AI Quality Validation (10+ conversations)
 3. Usage Tracking Validation
-

Recommended Improvement: Smart Shop Analysis

Problem

Current AI is **too generic** - same approach for all shops.

Solution

Build Shop Intelligence System:

```
interface ShopIntelligence {  
  category: 'fashion' | 'tech' | 'beauty' | 'home' | 'food';  
  priceRange: 'budget' | 'mid' | 'premium' | 'luxury';  
  brandVoice: 'professional' | 'casual' | 'playful';  
  targetAudience: string[];  
}
```

Benefits

- Fashion Shop: Focus on style, occasions, trends
- Tech Shop: Emphasize specs, compatibility, use cases
- Food Shop: Highlight ingredients, dietary info, pairings

This would make Qryx **10x better** than competitors!

Success Metrics

Target State

- Installation Completion: > 80%
 - Response Time: < 2 seconds
 - Product Match Rate: > 70%
 - Conversation Quality: Shop-specific
-

Database Queries

```
-- Check shop
SELECT * FROM shopify_shops WHERE shop_domain = 'shopbotv3.myshopify.com';

-- Check subscription
SELECT * FROM billing_subscriptions WHERE clerk_user_id = 'user_xxx';

-- Check usage
SELECT * FROM usage_tracking WHERE clerk_user_id = 'user_xxx';
```

Testing Checklist

Before Testing

- ☐ RPC migration executed
- ☐ Test shop accessible
- ☐ Stripe configured

Installation Flow

- ☐ New user flow works
- ☐ Payment processing works
- ☐ OAuth completes
- ☐ Shop appears in dashboard

AI Quality

- ☐ Bot responds naturally
- ☐ Bot mentions actual products
- ☐ Bot provides accurate prices
- ☐ Bot handles edge cases

Widget

- ☐ Loads in Shopify store
- ☐ Chat works
- ☐ Mobile responsive

Status: Ready for Testing
