

Updated Documentation for New Conversation

Created: January 2, 2026, 15:45 UTC

Purpose: Comprehensive reference for continuing JNX-OS development

Status: ACTIVE DEBUGGING SESSION

CURRENT STATUS: Active Debugging

Issue Being Debugged

Route: `/api/qryx/install?shop=shopbotv3.myshopify.com`

Error: "Application error: a server-side exception has occurred"

Digest: 4057891335

Fixes Already Applied

1. **Commit 76f2a19** : OAuth Callback for SaaS Flow
 - Callback now uses `currentUser()` instead of creating new users
 - Links shop to EXISTING user/org
 - Added `clerk_user_id` to `upsertShopifyShop()`
2. **Commit e77c40b** : Async Cookies API
 - Fixed `cookies()` to be async for Next.js 14.2+
 - Updated `setShopSession()`, `getShopSession()`, `clearShopSession()`
3. **Commit d68489d** : Debug Logging
 - Added extensive logging to `/api/qryx/install`
 - Removed external dependency (inline `isValidShop`)
 - Non-blocking error handling for session and auth

Next Steps

1. Wait for Vercel deployment (~2 min)
 2. Test: `https://www.jnxlabs.ai/api/qryx/install?shop=shopbotv3.myshopify.com`
 3. If still failing, check Vercel Function Logs
 4. Look for `[Qryx Install]` log entries
-

What's Working

Phase 5A++ (Complete)

- Stripe Live Mode billing (3 tiers: \$29/\$79/\$199)
- Stripe webhook handler (5 events)
- Native SVG Logo component
- User/Admin dashboards with mobile responsiveness

-  Clerk authentication
-  Supabase database (9 tables)

Phase 5B (Complete)

-  Billing Dashboard UI (/app/billing)
-  Usage tracking endpoints
-  Plan management APIs

Phase 5C (DB Complete, Testing Flow)

-  Shop Intelligence database migration
-  shop_intelligence JSONB column added
-  analyzed_at timestamp column added
-  GIN index for JSONB queries
-  OAuth flow testing in progress

Key Files Modified (Jan 2, 2026)

/app/api/qryx/callback/route.ts

Change: Complete rewrite for SaaS flow

```
// Now uses:
import { currentUser } from '@clerk/nextjs/server';
import { getUserByClerkId } from '@lib/db/helpers';

// Instead of creating new users, it:
const clerkUser = await currentUser();
const jnxUser = await getUserByClerkId(clerkUser.id);
await upsertShopifyShop({
  org_id: jnxUser.org_id,
  clerk_user_id: clerkUser.id,
  // ... shop data
});
```

/app/api/qryx/install/route.ts

Change: Debug version with extensive logging

```

export async function GET(request: NextRequest) {
  console.log('[Qryx Install] === START ===');

  // Non-blocking session save
  try {
    await setShopSession(shop);
  } catch (sessionError) {
    console.error('[Qryx Install] Session save error:', sessionError);
    // Continue anyway
  }

  // Non-blocking auth check
  let user = null;
  try {
    user = await currentUser();
  } catch (authError) {
    console.error('[Qryx Install] Auth check error:', authError);
  }

  // Redirect based on auth status
  const baseUrl = 'https://www.jnxfabs.ai';
  if (user) {
    return NextResponse.redirect(`${baseUrl}/products/qryx/setup`);
  } else {
    return NextResponse.redirect(`${baseUrl}/login?redirect_url=/products/qryx/setup`);
  }
}

```

/lib/session/shop-session.ts

Change: Async cookies() for Next.js 14.2+

```

// Before:
cookies().set(COOKIE_NAME, token, {...});

// After:
const cookieStore = await cookies();
cookieStore.set(COOKIE_NAME, token, {...});

```

/lib/db/qryx-helpers.ts

Change: Added clerk_user_id parameter

```

export async function upsertShopifyShop(data: {
  org_id: string;
  clerk_user_id?: string; // NEW: For user-based billing
  shop_domain: string;
  // ...
})

```

Correct SaaS Installation Flow

USE THIS URL:

<https://www.jnqlabs.ai/api/qryx/install?shop=shopbotv3.myshopify.com>

DO NOT USE:

<https://shopbotv3.myshopify.com/admin/oauth/authorize?...>

Expected Flow:

1. `/api/qryx/install?shop=xxx`
 - ☐ Save shop to session
 - ☐ Check auth status
 - ☐ Redirect to login OR setup
2. `/login` (if not authenticated)
 - ☐ Clerk login
3. `/products/qryx/setup`
 - ☐ Select plan (Starter/Professional/Business)
4. Stripe Checkout
 - ☐ Payment
5. `/api/qryx/start-oauth`
 - ☐ Trigger Shopify OAuth
6. Shopify OAuth Screen
 - ☐ Approve permissions
7. `/api/qryx/callback`
 - ☐ Get authenticated user (currentUser)
 - ☐ Get JNX user (getUserByClerkId)
 - ☐ Link shop to existing org (upsertShopifyShop)
 - ☐ Save shop session
8. `/app/qryx` (Dashboard)

Environment Variables

Vercel (Production) - VERIFIED

SHOPIFY_APP_URL=https://www.jnqlabs.ai ☒
 SHOPIFY_API_KEY=6e62aef5f8013048ca5b446fa86c6fae ☒
 SHOPIFY_API_SECRET=shpss_XXXX ☒
 SHOPIFY_SCOPES=read_products,read_product_listings,read_customers,read_orders ☒

Shopify Partners - NEEDS VERIFICATION

Allowed redirection URL(s):
<https://www.jnxfabs.ai/api/qryx/callback> ← Must be set!

Key File Locations

File	Purpose
/app/api/qryx/install/route.ts	Entry point for installation
/app/api/qryx/callback/route.ts	OAuth callback (SaaS flow)
/app/api/qryx/start-oauth/route.ts	Triggers Shopify OAuth
/lib/session/shop-session.ts	JWT session management
/lib/db/qryx-helpers.ts	Shop database operations
/lib/shopify/client.ts	Shopify API client
/products/qryx/setup/page.tsx	Plan selection page

Testing Commands

```
# Navigate to project
cd /home/ubuntu/jnx-os/nextjs_space

# Build and check for errors
yarn build

# Start dev server
yarn dev

# Run Playwright tests
yarn playwright test

# Check git status
git log --oneline -5

# Push to GitHub (triggers Vercel deploy)
git push origin main
```

Git Commits (Recent)

```
d68489d - Debug: Add extensive logging to /api/qryx/install
e77c40b - Fix: Async cookies() in shop-session for Next.js 14.2+
76f2a19 - Fix: SaaS-Flow OAuth Callback for existing users
b8f47bd - Fix: Smart redirect for authenticated users in Qryx install flow
05b6e5b - Phase 5C: Shop Intelligence database migration
```

-

Checklist for Debugging

- [x] OAuth callback rewritten for SaaS flow
 - [x] Async cookies() for Next.js 14.2+
 - [x] Debug logging added to install route
 - [x] clerk_user_id added to shop upsert
 - [x] Code pushed to GitHub
 - [] Vercel deployment verified
 - [] Test install URL working
 - [] Check Vercel Function Logs for errors
 - [] Verify Shopify Partners redirect URL
-
