# ðŸ“š Updated Documentation for New Conversation

**Created:** December 31, 2025, 10:35 UTC
**Purpose:** Comprehensive reference for continuing JNX-OS development

---

## âœ… Updated Documents

### 1. â **JNX_OS_MASTER_DOCUMENTATION_V2** (NEW)
**File:** `JNX_OS_MASTER_DOCUMENTATION_V2.md` / `.pdf` (953 lines)

**Consolidated Master Reference** containing:
- Complete project overview
- All 9 database tables with schema
- All 13 API endpoints
- Stripe integration (3 pricing tiers)
- Logo design system (NEW)
- Testing guide (24 tests)
- File structure (complete tree)
- Deployment status
- Phase roadmap
- Success metrics

**Use this as your PRIMARY reference!**

---

### 2. ðŸ’³ **Stripe Setup Guide V2**
**File:** `STRIPE_SETUP_GUIDE_V2.md` / `.pdf`

**Updated with:**
- Logo integration notes
- Complete webhook configuration
- Subscription lifecycle
- Test cards
- Security best practices
- Monitoring setup

**Key Info:**
- 3 Plans: $29/$79/$199
- 5 Webhook events
- Live mode active
- Production URL: `https://www.jnxlabs.ai/api/stripe/webhook`

---

### 3. ðŸŽˆ **Logo Design Documentation**
**File:** `LOGO_DESIGN_DOCUMENTATION.md`

**Complete Logo System:**
- SVG component architecture
- 2 color variants (default/admin)
- Framer Motion animations
- Integration examples
- Performance analysis
- Props interface

**Component:** `components/ui/jnx-logo.tsx`

---

### 4. ðŸ–Œ, ðŸ“š **Database Schema Reference**
**Included in Master Doc**

**9 Tables:**
1. `orgs` - Organizations
2. `users` - User accounts
3. `billing_subscriptions` - Stripe subscriptions
4. `qryx_shops` - Shopify stores
5. `qryx_conversations` - Chat history
6. `qryx_messages` - Messages
7. `audit_logs` - Audit trail
8. `system_events` - System events
9. `data_export_requests` - GDPR exports

**23 Indexes + 6 Foreign Keys**

---

### 5. ðŸ”€ **API Endpoints Reference**
**Included in Master Doc
```

- **13 Endpoints Documented:****
- User dashboard (4 endpoints)
 - Qryx API (7 endpoints)
 - Stripe API (2 endpoints)
 - System API (2 endpoints)

- All endpoints include:
- HTTP method
 - Auth requirements
 - Request/response format
 - Error handling

6. ðŸ§ª **Testing Guide Phase 5A**

****Included in Master Doc****

- **24 Tests across 5 scenarios:****
1. New user flow (6 tests)
 2. Existing user flow (4 tests)
 3. Session expiry (4 tests)
 4. Payment failure (5 tests)
 5. Webhook retry (5 tests)

****Test Framework:**** Playwright

****Coverage:**** 54% automated, 46% manual

ðŸ“Š What's New Since Last Conversation?

- ### Logo System (Phase 5A++)**
- âœ… ****NEW Component:**** `components/ui/jnx-logo.tsx`
- Native SVG (not PNG import)
 - 2 variants: default (cyan) | admin (purple)
 - Animated with Framer Motion
 - 3 sizes: sm/md/lg
 - 0 KB file size (inline)

- ### Integration Points**
- âœ… Homepage header/footer
- âœ… QRYX product card
- âœ… User dashboard sidebar
- âœ… Admin dashboard sidebar

- ### Git Status**
- âœ… Commit: `4015b5f`
- âœ… Pushed to GitHub
- âœ… Deployed to Production
- âœ… Checkpoint saved

ðŸ§€ Current Deployment Status

- ### Production**
- ****URL:**** <https://www.jnxlabs.ai>
 - ****Status:**** âœ… Live
 - ****Last Deploy:**** Dec 31, 2025, 10:20 UTC
 - ****Build:**** âœ… Successful (0 errors)

- ### Environment**
- ****Clerk:**** Live Mode
 - ****Supabase:**** Production
 - ****Stripe:**** Live Mode
 - ****Shopify:**** App Credentials Active

- ### Performance**
- ****Build Time:**** < 90s
 - ****Bundle Size:**** 87.3 KB (shared)
 - ****Dashboard Load:**** < 3s
 - ****Uptime:**** 99.9%+

---

## ðŸŽ˜ For the New Conversation

### Quick Start Commands

``bash

# Navigate to project

cd /home/ubuntu/jnx-os/nextjs\_space

# Install dependencies (if needed)

yarn install

# Start dev server

yarn dev

# Build for production

yarn build

# Run tests

yarn playwright test

â"„

### Key Context to Share

1. **Project Status:** Phase 5A++ complete (Logo integration done)
2. **Last Commit:** ``4015b5f`` (Logo SVG component)
3. **Production:** Live at [www.jnxlabs.ai](http://www.jnxlabs.ai)
4. **Next Phase:** Phase 5B (Billing Dashboard)

### Important Notes

- Logo is now SVG component (not PNG)
- All webhooks are idempotent
- Session management uses JWT (30min TTL)
- Database has 9 tables, fully indexed
- Testing suite: 24 tests (54% automated)
- Documentation: 25+ files, all up-to-date

---

## âš¡ Priority References

### For Development

1. ``JNX_OS_MASTER_DOCUMENTATION_V2.md`` - Complete reference
2. ``components/ui/jnx-logo.tsx`` - Logo implementation
3. ``lib/db/helpers.ts`` - Database operations
4. ``lib/stripe/client.ts`` - Stripe integration

### For Deployment

1. ``VERCEL_DEPLOYMENT_CHECKLIST.md`` - Deploy guide
2. ``STRIPE_SETUP_GUIDE_V2.md`` - Stripe config
3. ``.env`` - Environment variables

### For Testing

1. ``tests/e2e/`` - Playwright tests
2. ``TESTING_GUIDE_PHASE5A.md`` - Test guide
3. ``playwright.config.ts`` - Test config

---

## ðŸ”— External Resources

- ### Dashboards
- Clerk: <https://dashboard.clerk.com>
  - Supabase: <https://supabase.com/dashboard>
  - Stripe: <https://dashboard.stripe.com>
  - Vercel: <https://vercel.com/jnxlabs>

- ### Production
- Website: <https://www.jnxlabs.ai>
  - Test Store: [shopbotv3.myshopify.com](https://shopbotv3.myshopify.com)
  - GitHub: <https://github.com/JNXLabs/jnx-os>

---

## â€¦ Checklist for New Agent

- [ ] Read `JNX\_OS\_MASTER\_DOCUMENTATION\_V2.md`
- [ ] Understand logo system (`components/ui/jnx-logo.tsx`)
- [ ] Review database schema (9 tables)
- [ ] Check deployment status (Vercel)
- [ ] Verify all env vars configured
- [ ] Review Phase 5B requirements
- [ ] Check git status (`git log --oneline -5`)

---
